*Life Cycle Of Hen*

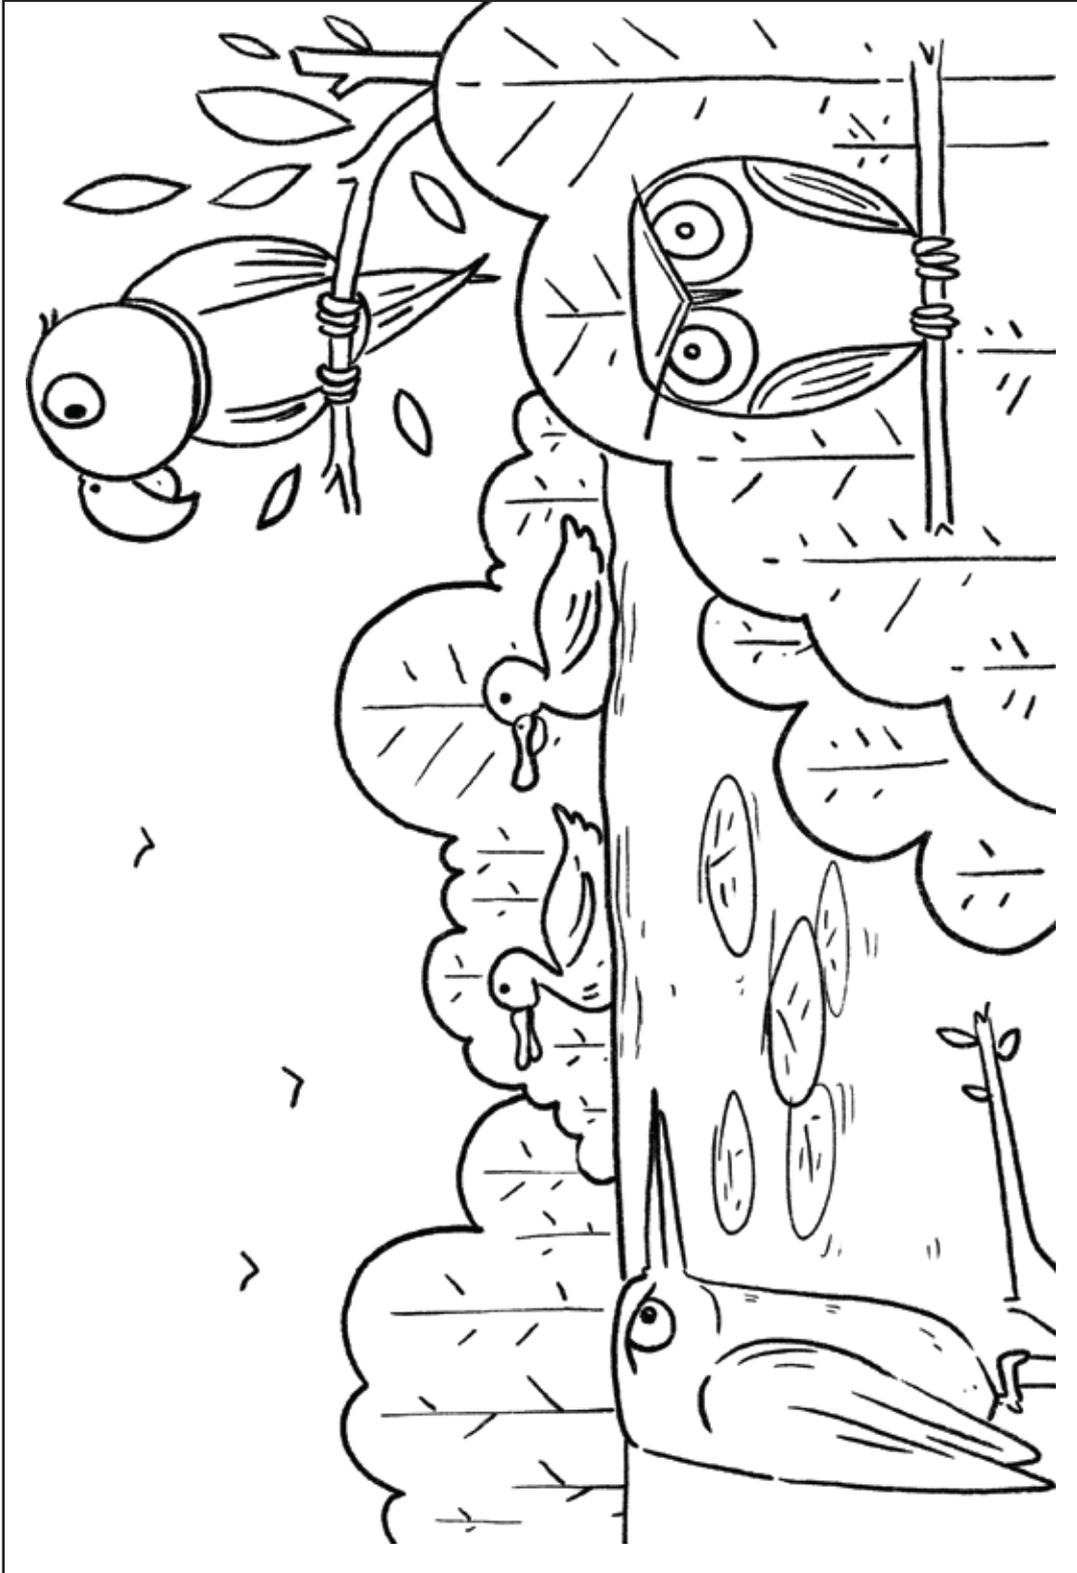

*Cognition, Fine Motor, Vocabulary*

# Colourful Birds

There are a parrot, owl, kingfisher and few ducks.  
Looks like there colours are missing!

Help your preschooler colour the bird habitat in any manner. Then, describe the scenery and encourage them to talk about different birds. (Note: An image has been given for your reference)

Reference Image

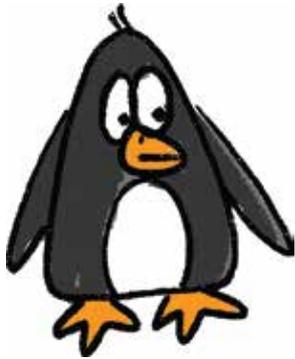

## How This Activity Helps

Colouring improves your preschooler's wrist-finger coordination and creativity.

# Where We Belong?

In one column are the birds — penguin, hen, and duck; in the other are their environments. Do you know where they belong?

Help your preschooler match each bird with its correct environment. Then, describe the environments.

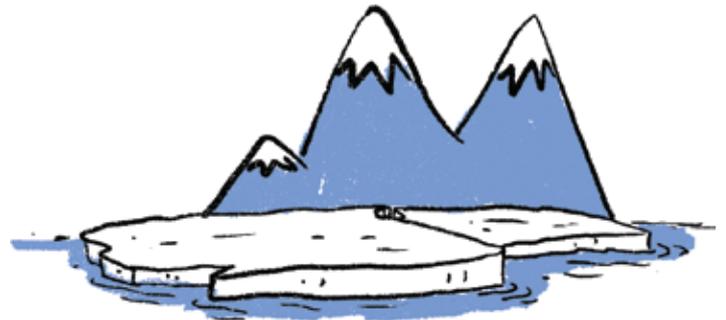

Penguin

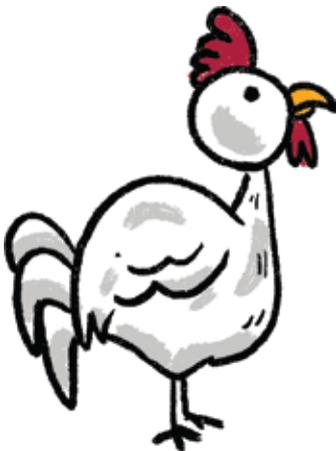

Coop

Duck

Ice

Hen

Lake

## How This Activity Helps

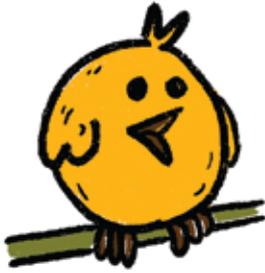

As your preschooler identifies the correct environment, they exercise their logic and reason. Talk to your child about what makes the birds different from each other.

# Spot The Odd One

There are birds. Then, there are a few others. Something seems to be odd though.

Introduce your preschooler to each element. Help them identify and circle the odd one out in each line. Then, encourage them to tell why that element is the odd one out.

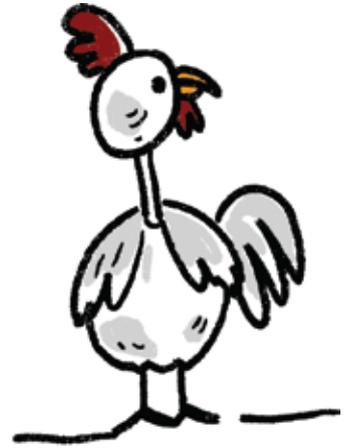

1.

Sparrow

Cat

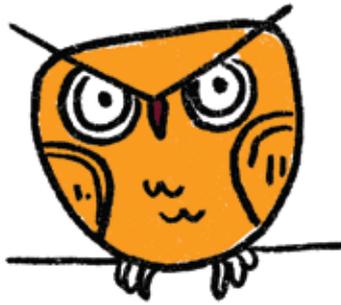

Hen

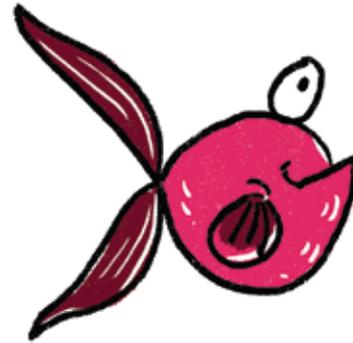

2.

Owl

Owl

Fish

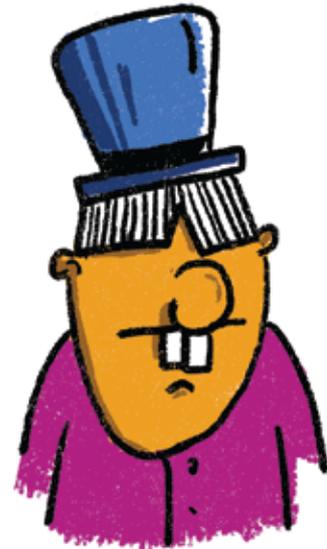

3.

Kingfisher

Kingfisher

Person

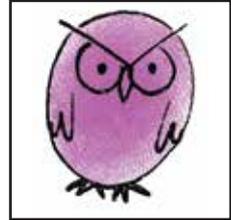

## How This Activity Helps

By comparing the different elements and identifying the odd one out, your preschooler exercises their logical reasoning skill.

# Fingerprinted Birds

*Little birds, little birds, where are your colours?*

*Help your preschooler dab some child-friendly paint on their fingers and finger-paint the make the birds colourful. Make them as colourful as possible. (Note: An image has been given for your reference)*

*Reference Image*

## How This Activity Helps

*While your preschooler dips their finger in paint and imprints on the paper, they develop their hand-eye coordination.*

# Penguins Swim

1,2,3...and wheeee! The penguins want to go swimming. Can you help them?

Help your preschooler trace along the dotted lines to help the penguins reach the Antarctic waters so they can swim away. Once done, how about a story about the penguins?

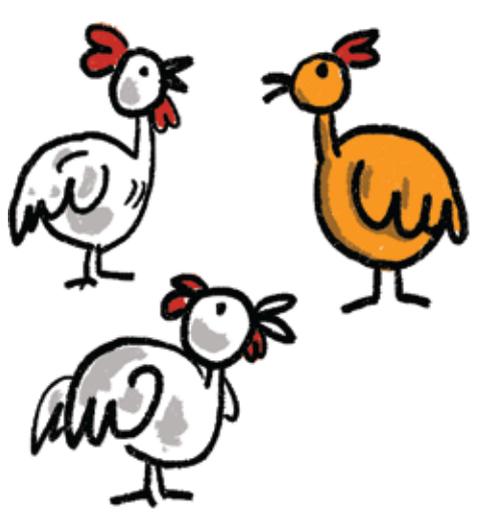

## How This Activity Helps

As your preschooler traces along the lines, they exercise their pincer grip. Developing their fine motor skills prepares them for writing.

# Counting Birds

1,2,3... How many birds can you spot?

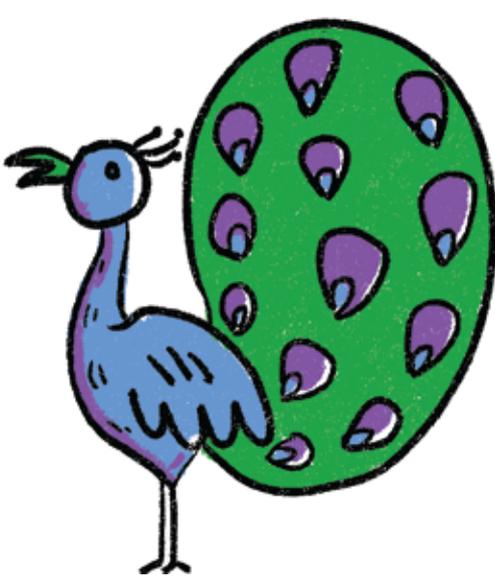

Help your preschooler count and circle the right number of birds. Then, identify the birds — hen, owl, peacock.

6      7      3

9      6      3

8      1      5

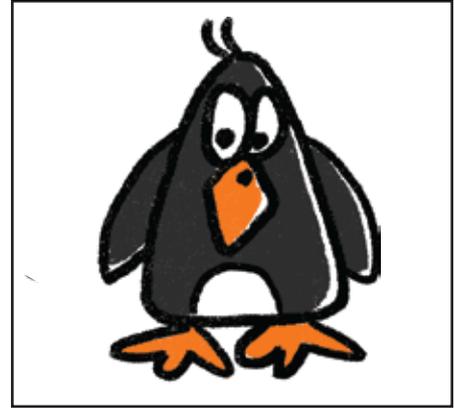

## How This Activity Helps

Your preschooler learns to count and recognize the numbers as patterns. On a sheet of paper, help your child dip their hands in paint and write the numbers from 1-5.

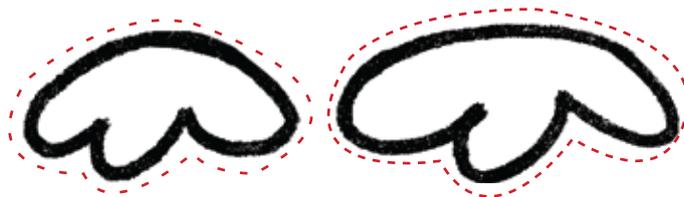

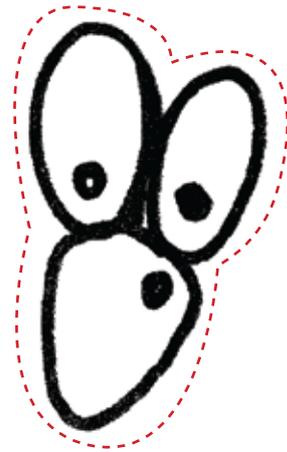

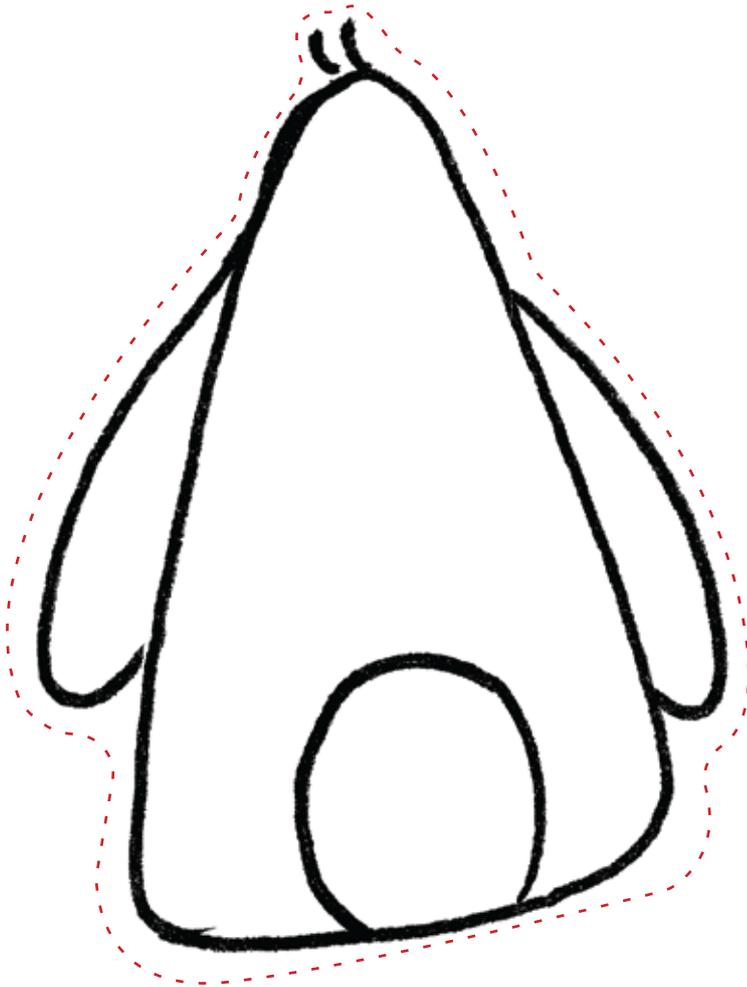

# My Little Penguin

Do you know how a penguin looks? Can you put one together?

Help your preschooler colour the penguin body and its parts in any manner. Then, cut them out and stick them to complete the penguin. Discuss with them about the different parts of the penguin — eyes, beak, feet, and body. (Note: An image has been given for your reference)

Reference Image

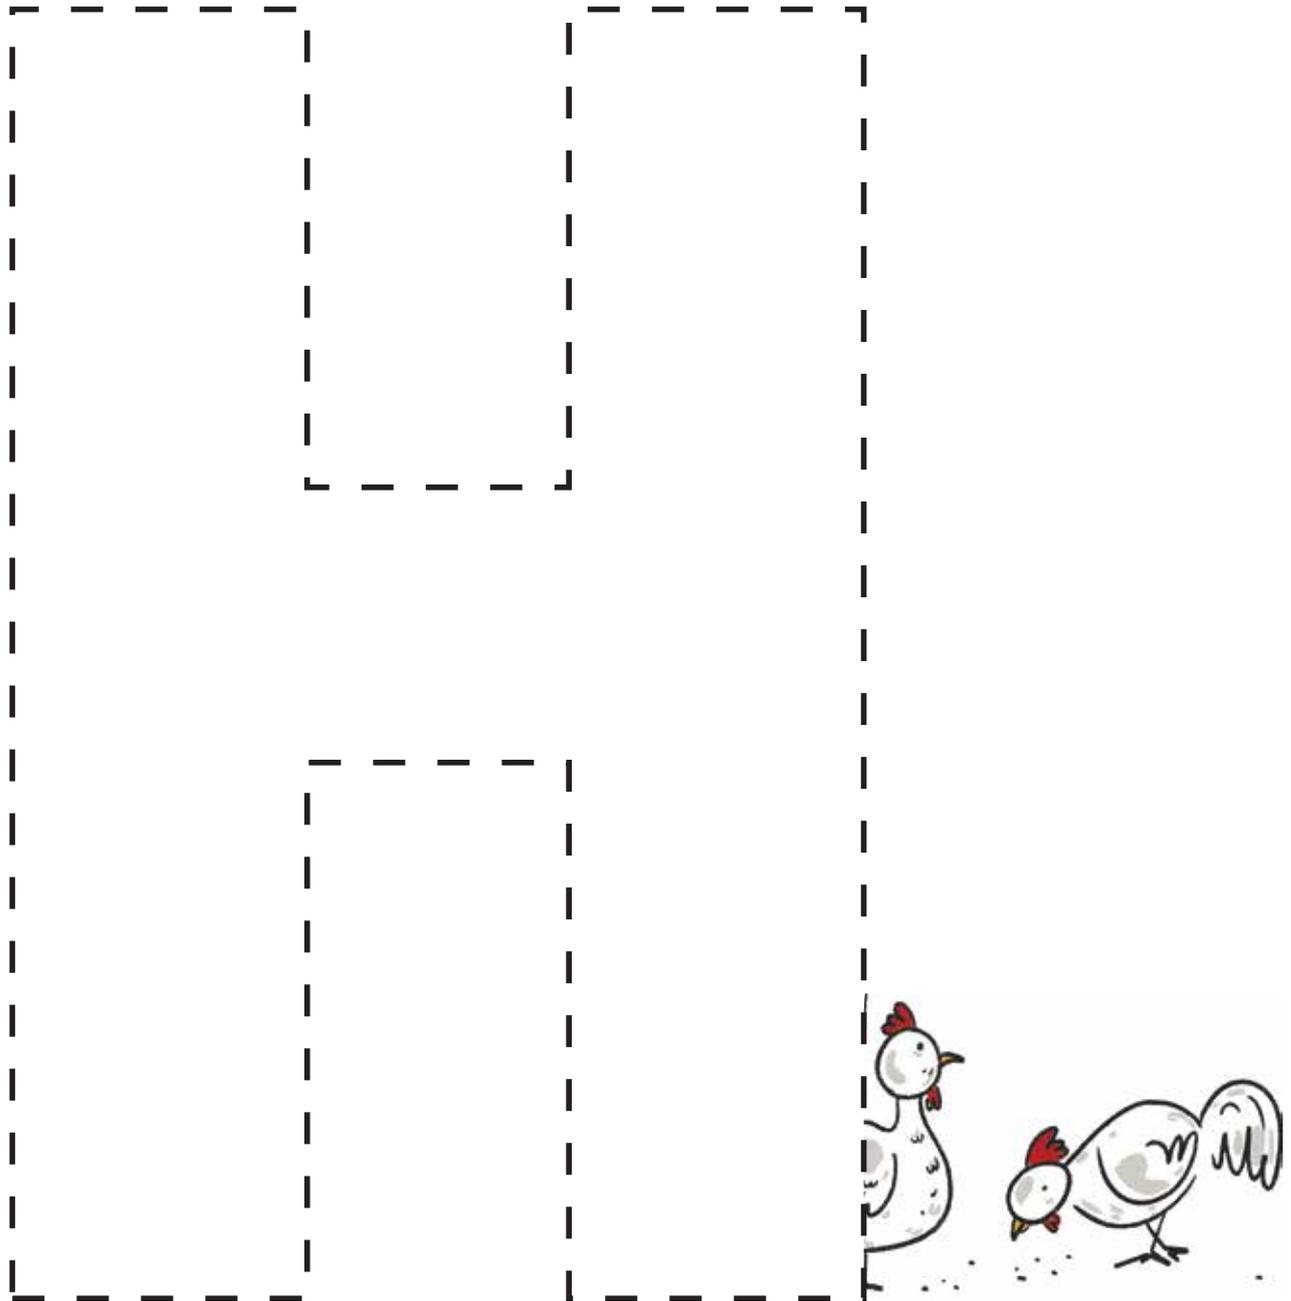

## How This Activity Helps

Your preschooler's problem-solving skills develop as they assemble the penguin. Ask your child to describe the penguin and then narrate a story about a penguin. "Little penguin slides down the snow slope and 'plop', into the water it goes..."

# B For Birds

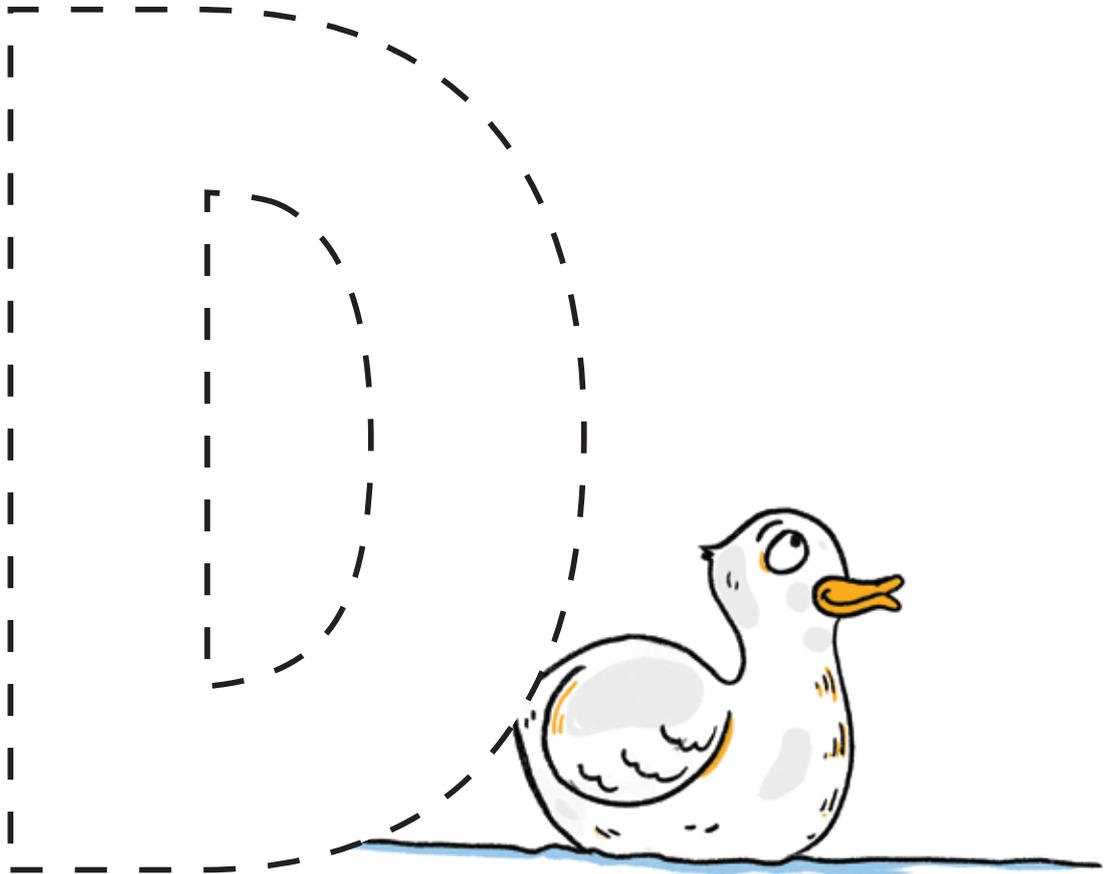

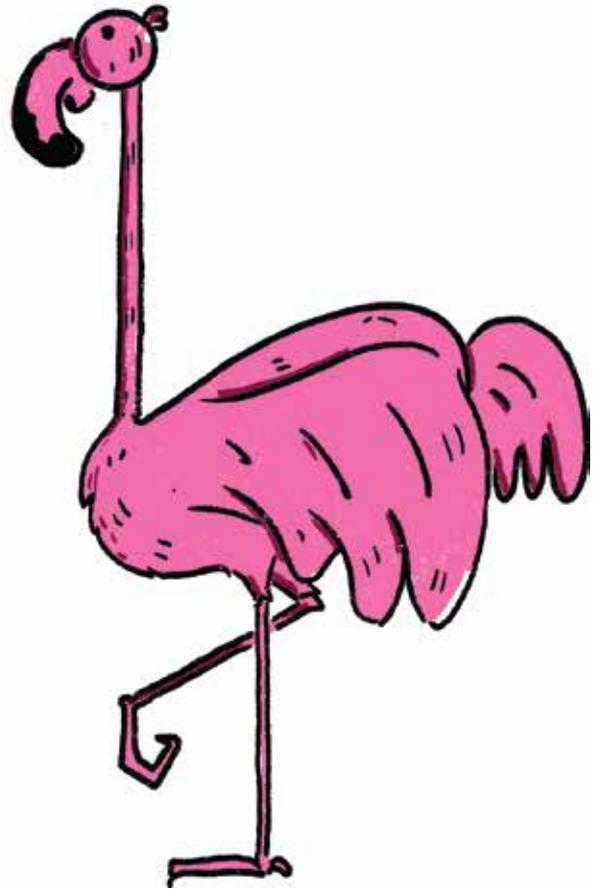

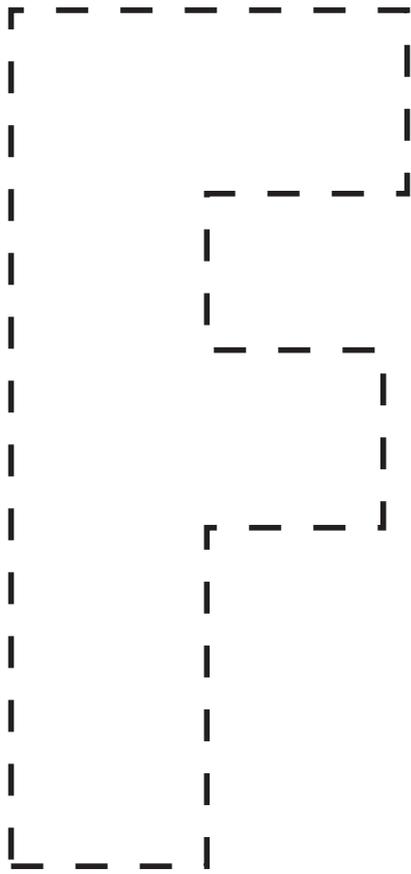

*H for Hen, F for Flamingo, D for Duck...! Are you ready to learn the letters?*

*Help your preschooler draw along the dotted lines using a crayon and then colour in them. Introduce them to the name of each bird.*

## How This Activity Helps

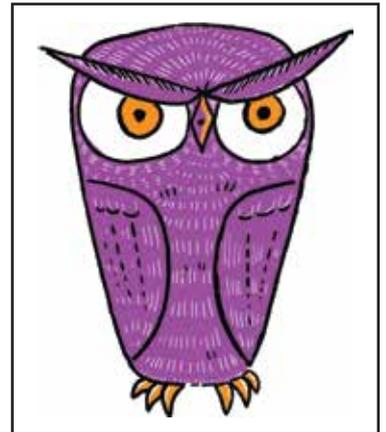

*Tracing along the dotted lines develops your preschooler's fine motor ability.  
Help your child describe each bird and tell a story each.*

# Complete The Owl

Hoot.....hoooooot! Something seems amiss in the owl.

Help your preschooler complete the owl by drawing along the dotted lines and then finger-painting to give the owl its coloured. How about a colourful owl!?  
(Note: An image has been provided for your reference)

Reference Image

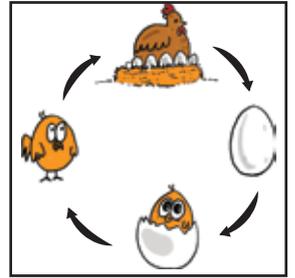

## How This Activity Helps

Your preschooler's concentration and attention span increase as they attempt to colour the owl. Introduce your child to this nocturnal bird. How about a story? It can start like this: "The little owl hooted through the night...hoot...hoot..."

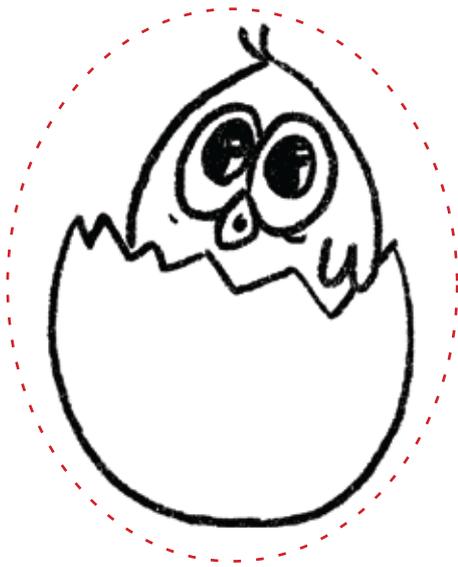

# Lifecycle of Hen

From an egg to the hen, are you ready to learn about the life cycle of hen?

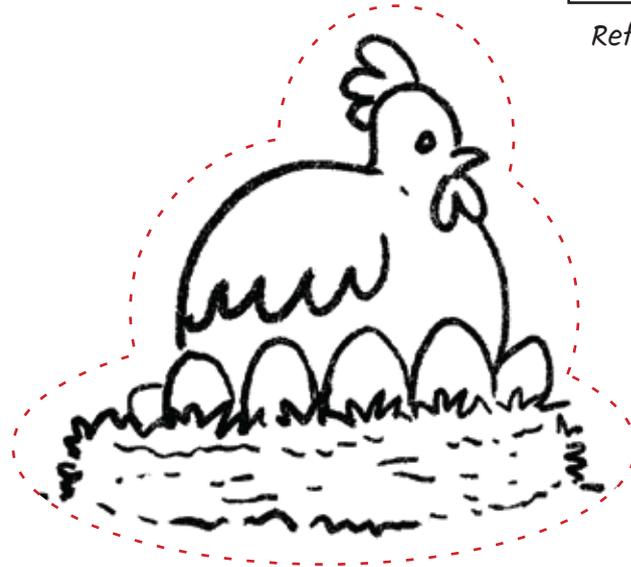

Help your preschooler cut and paste the different stages in the life cycle of a hen — egg, hatchling, chick, and hen — on another sheet of paper. Then, describe each stage.

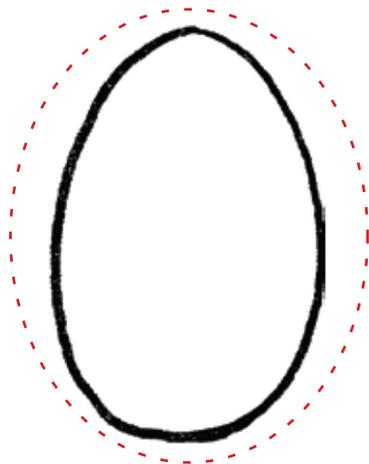

Reference Image

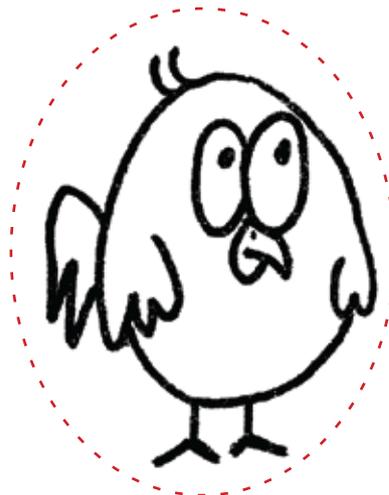

Hatchling

Hen

Egg

Chick

## How This Activity Helps

Help your preschooler cut and paste the different stages in the life cycle of a hen — egg, hatchling, chick, and hen — on another sheet of paper. Then, describe each stage.
