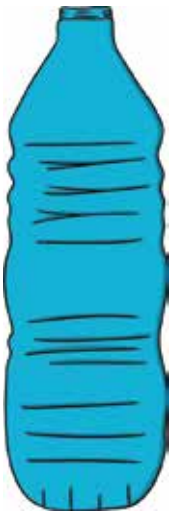
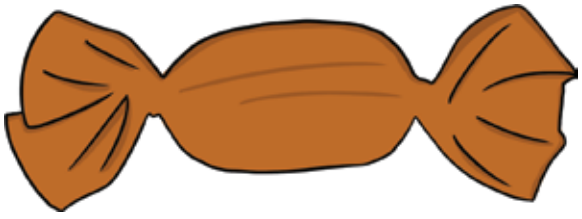
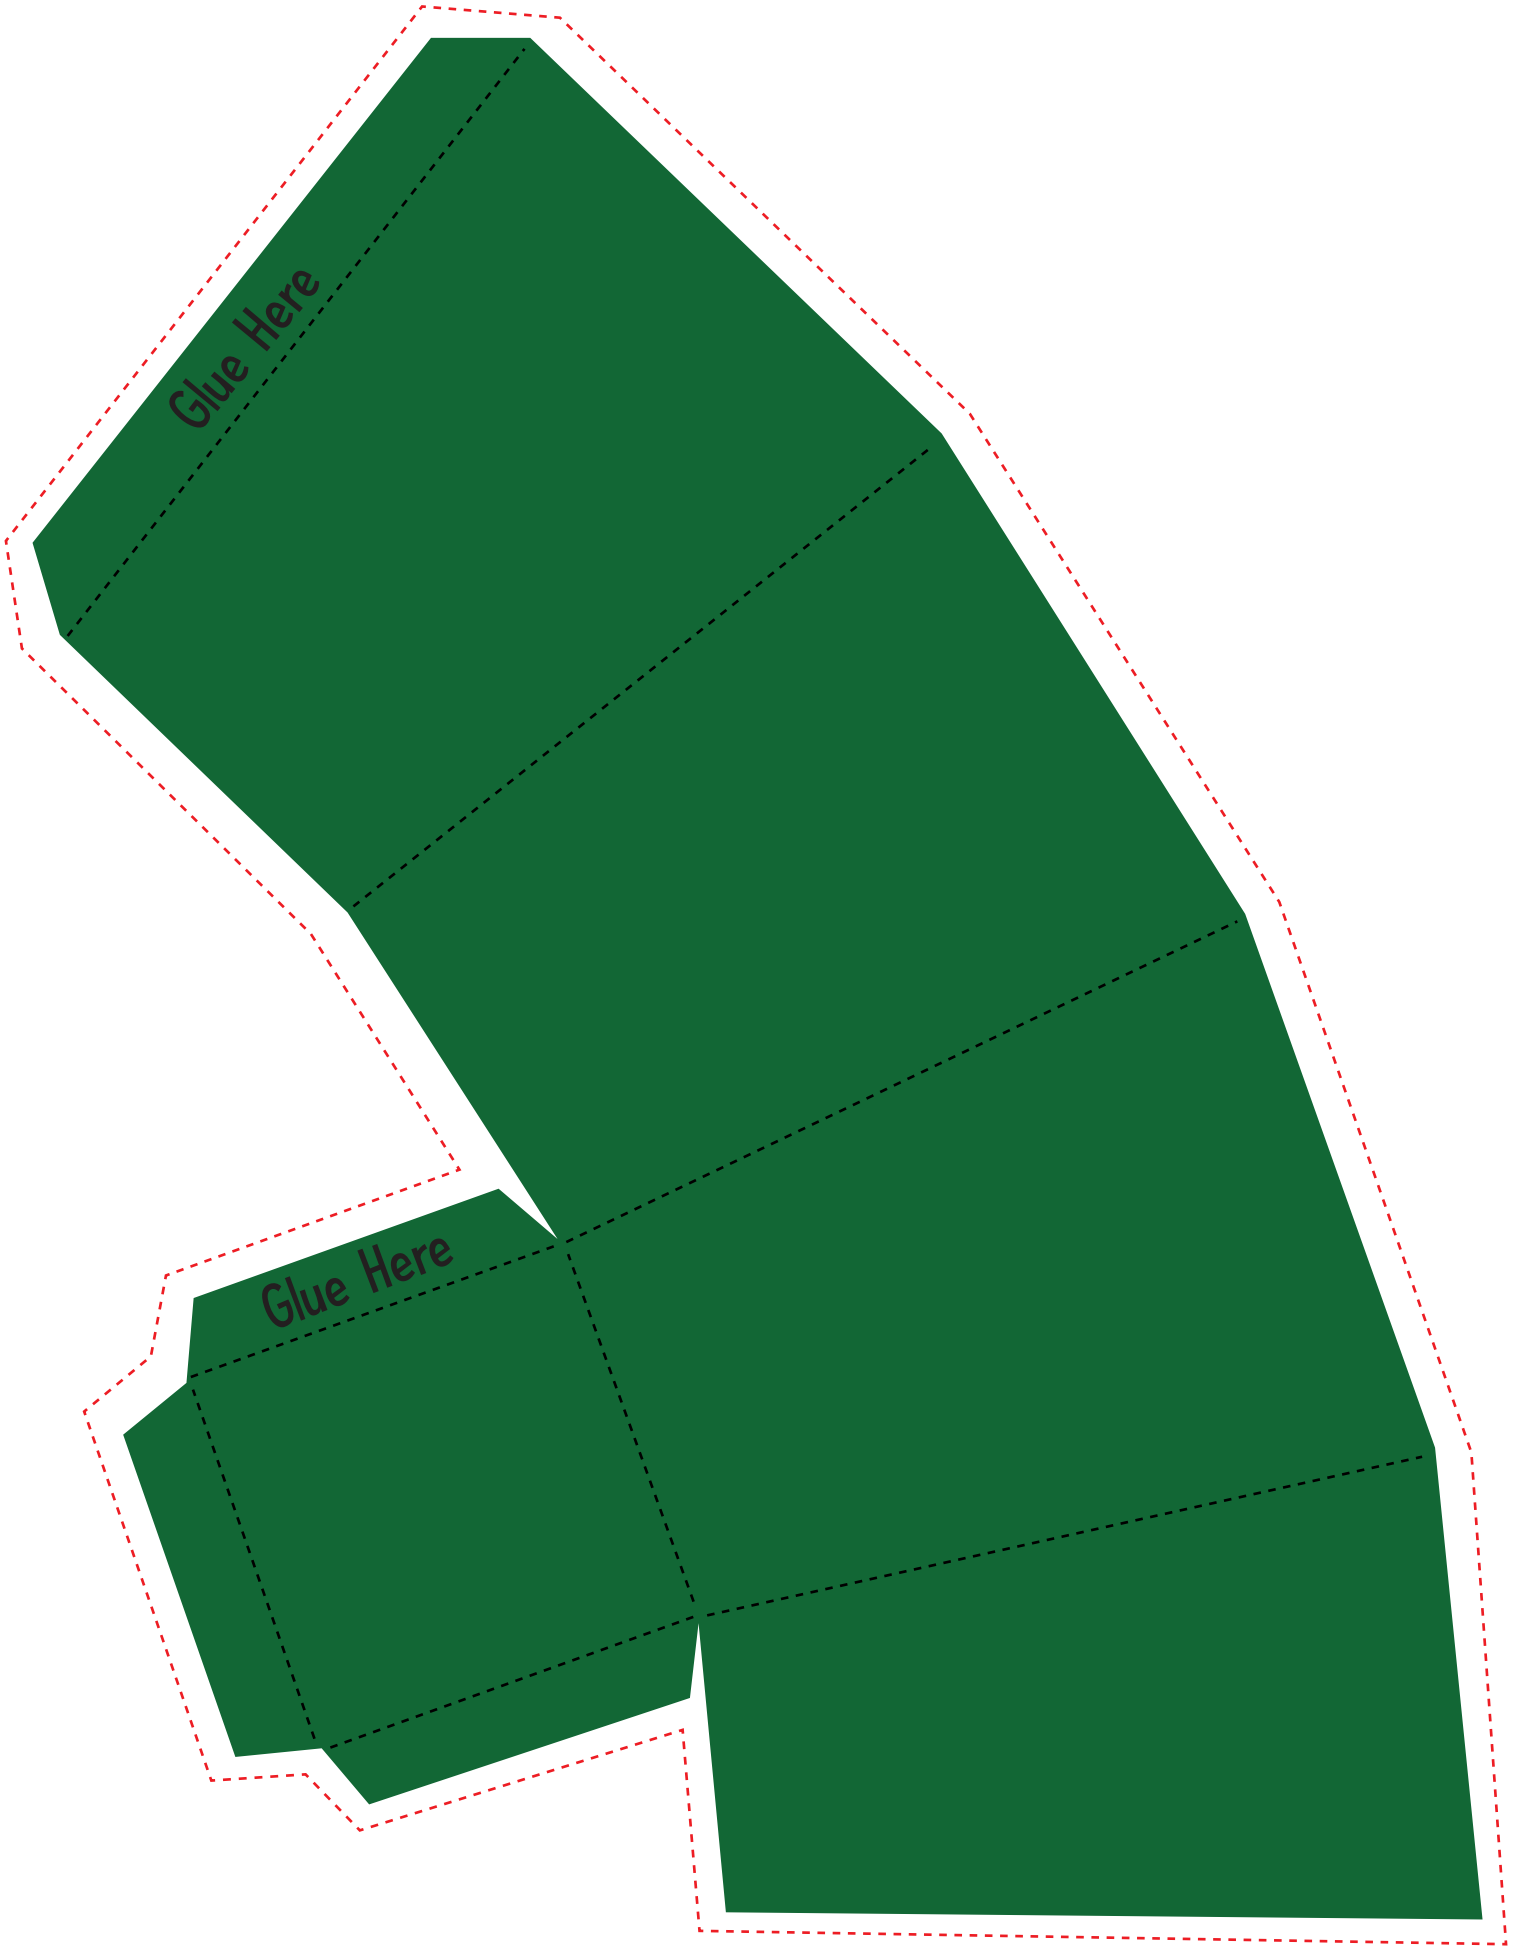
Activity Name	Skills Acquired
Segregating Waste!	Problem Solving, Fine Motor, Creativity
Green Connections	Critical Reasoning, Vocabulary, Problem Solving
Reduce, Reuse, Recycle	Critical Thinking, Cognition, Logical Reasoning
I Can...	Communication, Explore, Cognition
Saving Water	Cognition, Reasoning, Discovery
I Spy Pollution	Play, Problem Solving, Logical Reasoning
Growing A Plant	Logical Reasoning, Creativity, Fine Motor
What Pollutes The Air?	Reasoning, Play, Cognition
Types Of Pollution	Problem Solving, Cognition, Observation
Know Your Signs!	Creativity, Discovery, Fine Motor

Segregating Waste!

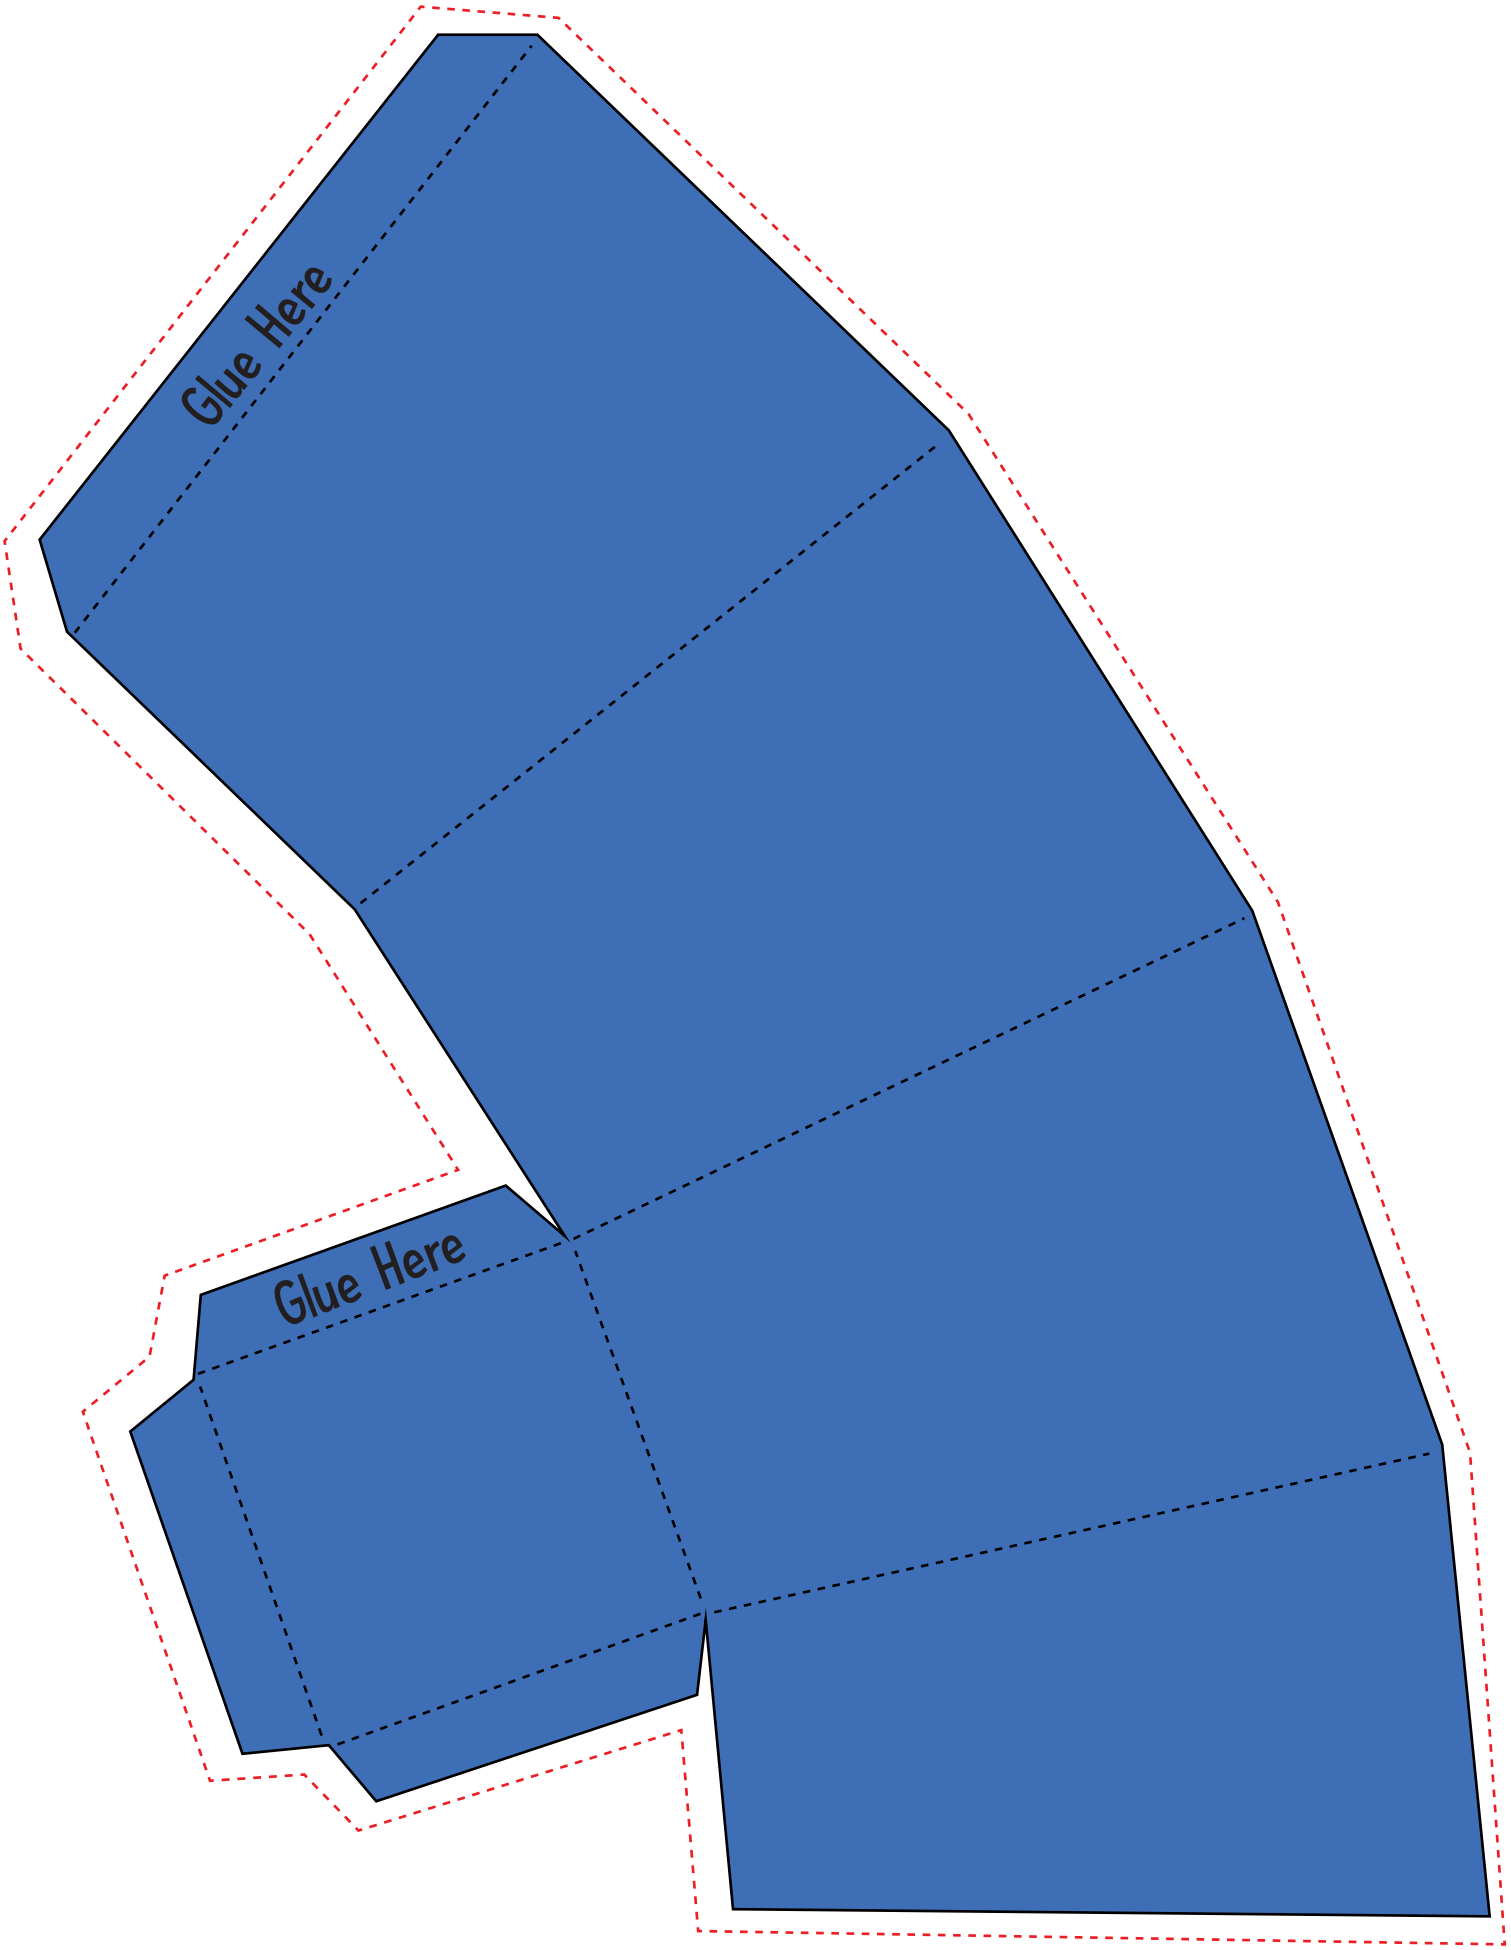
Here are the items that may get collected at our homes. We can put them in two different garbage bins. Assemble the bins by folding and sticking the edges. Blue bin is for the plastic and paper waste; green bin is for the biodegradable waste. Cut and place the different waste items in the correct bins.







Glue Here
Glue Here



How This Activity Helps

As you cut and assemble the bins, you develop your fine motor and coordination skills.

Green Connections

All the images are connected to the text. Can you make the connections? Draw a line to match the word with its corresponding image.

1. Switch-off

2. Plant

3. Save

4. Recycle

5. Feed

a.

b.

c.

d.

e.

How This Activity Helps

Matching the words with their corresponding images helps you make connections of everyday elements and how we can help the Earth.

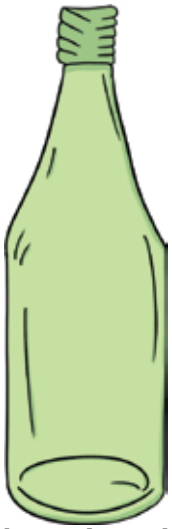
Answer: 1-e, 2-c, 3-d, 4-b, 5-a

Reduce, Reuse, Recycle

One of the most important ways of contributing to a clean surrounding is by managing our waste. We can follow the 3R's to manage our waste — reduce, reuse, and recycle. There are different waste items given. Cut and place them in their correct columns.

Reduce	Reuse	Recycle

Battery



Glass bottle

Package food

Old clothes

Cloth bag

How This Activity Helps

As you complete this activity, you learn about which everyday items can be reduced, reused, or recycled.

Answer: Reduce -Packaged Foods; Reuse -Battery, Cloth Bags; Recycle -Old Clothes, Glass Bottles

I Can...

Here are a few things we can do to be more environment friendly. Complete the sentences with the images as clues to see a list of things we can do to keep our environment clean and green.

A. Instead of using plastic bags, I can take my own

.....

B. Instead of travelling by a car or scooter, I can can use

.....

C. Instead of cutting down trees, I can

..... trees.

D. Instead of throwing away plastic items, I can

..... them.

How this activity helps

You've just learned about some everyday changes you can do to be a green warrior!

Answer: A.Cloth Bag, B.Public Transport, C.Plant, D.Recycle

Saving Water

There are so many instances in our daily life where we waste a lot of water. There are different day-to-day activities given below. Can you identify the ones where water is being wasted and the ones where water is being saved. Under each image, circle 'W' for'wasting' or 'S' for 'saving'.

1

S / W

2

S / W

3

S / W

4

S / W

5

S / W

How this activity helps

You exercise your logic to identify where water is being saved/wasted.

Answer: 1.Wasting, 2.Wasting, 3.Saving, 4.Saving, 5.Wasting

I Spy Pollution

Pollutants causes pollution. There are many pollutants around us that harm our environment. Can you spot the pollutants hidden in the picture given below?

How this activity helps

You focus and observation improves as you try to find the hidden pollutants.

Answer: 1.Oil Can, 2.plastic bag, 3.Glass Bottle, 4.Slipper,5.Empty Cans, 6.Plastic Carrier

Growing A Plant

A plant grows up just as you do! Can you identify the different stages of the plant growth? Cut out the images given below. Arrange them in the correct order of plant growth.

a.

b.

c.

d.

How this activity helps

Identifying and placing the plant's growth in sequence exercises your cognition.

Answer: d, b, a, c

What Pollutes The Air?

Can you identify and circle the elements that causes air pollution?

How this activity helps

Finding all the causes of air pollution engages your logic & reason.
What are the different ways to reduce air pollution?

Types Of Pollution

There are different types of pollution: Air pollution (A); land pollution (L); noise pollution (N); water pollution (W). There are images of different pollution given below. Identify the type of pollution in each image and label it as 'A', 'L', 'N', or 'W'.

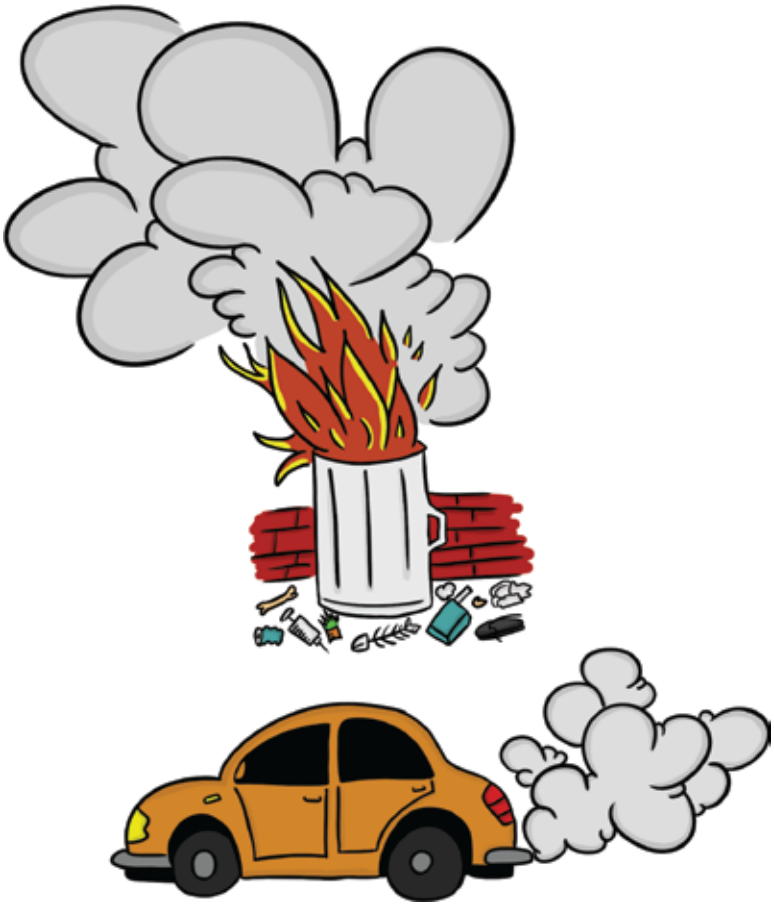
1

2

Answer: 1.W, 2.N

3

4



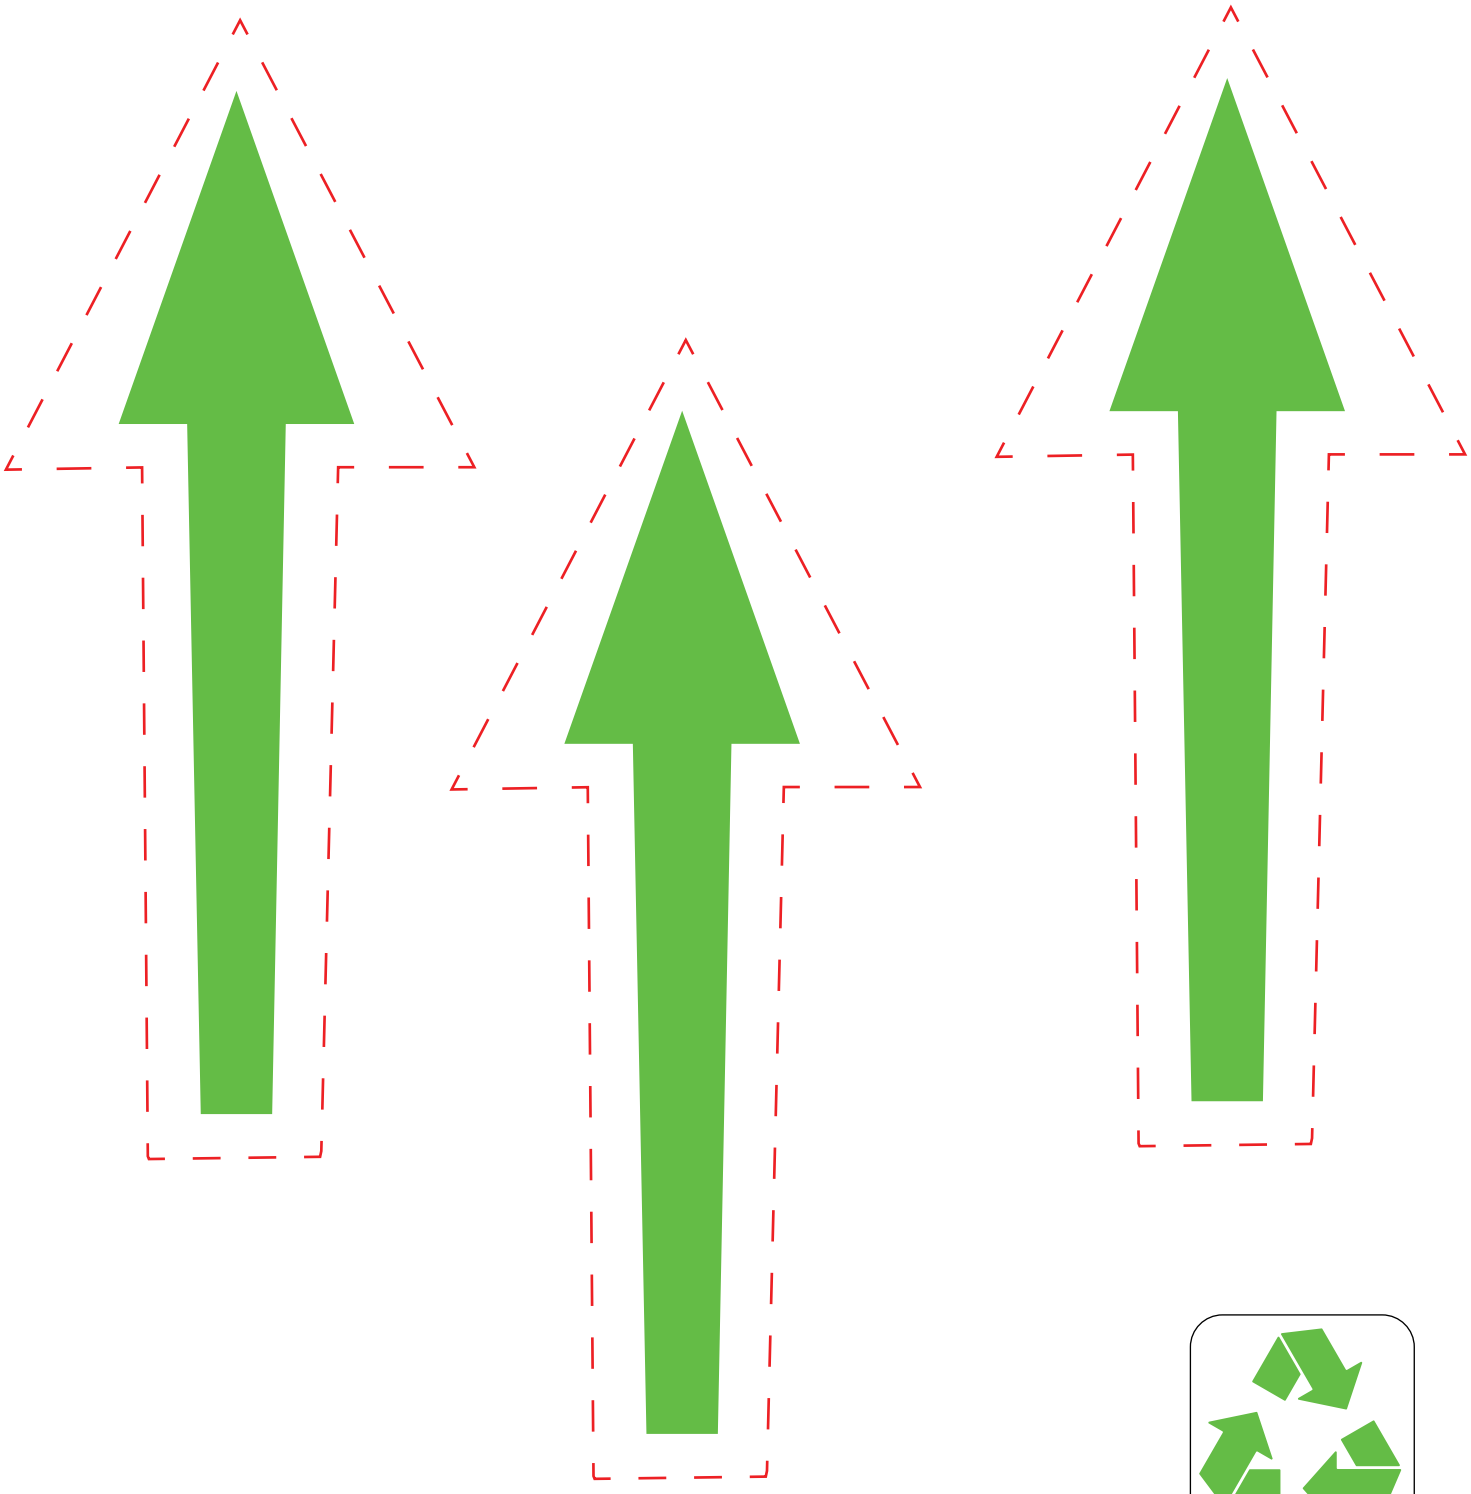
How this activity helps

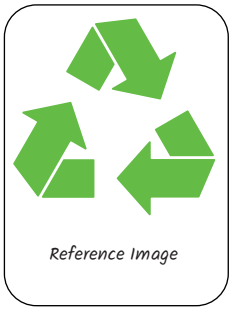
As you observe the elements in the images and identify the types of pollution, you develop your reasoning and observation skills.

Answer: 3.L, 4.A

Know Your Signs!

There are symbols that helps us in keeping our environment green. The arrows given can be used to create one such symbol. Cut out the arrow marks along the dotted lines. Use the reference image given to create the sign and paste it on another sheet. When you see this sign on an item, it means that it can be recycled.





Reference Image

How this activity helps

This activity helps you know about the important signs and symbols that help in keeping our environment clean and green.
