Parts Of A Plant

The parts of plant are all over the place. Bring them together, see how a full plant looks, label the parts too. Oh, how about going to a garden to observe some plants!

Answers: Growing tip, Swollen leaf bud, Flower closed, Open Flower, Leaf vegetable, Stem, Swollen Stare base, Root vegetable

How this activity helps?

*You learn all about the external parts of a plant. Your observation skills improve.
You understand that there is a logic behind the anatomy of plants.*

Soil Layers

Soil is made up of multiple layers. Which one comes after which one? Look to observe, mark the layers correctly and colour them accordingly.

How this activity helps?

You learn important earth science concepts and gain knowledge about the layers of soil.

How Does It Rain?

Water evaporates from water bodies like ocean, sea, rivers, and lakes. The heat from sun causes evaporation and creates water vapour. This is collected as clouds. When the clouds cool down, it becomes water again. This is the water cycle and this is how we get rain.

Colour the illustration below and put it on your room.

How this activity helps?

You learn about water cycle and the terms associated with it.

Your creativity improves.

Leaf Name Matching

Each leaf looks distinctly different. Do you think you can name the plant by looking at the leaves? Put on your botanist hat, observe the leaves, and identify the plant. Oh, how about going out to find these leaves?

Mint

Peepal

Curry Leaf

Guava

How this activity helps?
Your curiosity increases and observation is sharpened.
You are introduced to plant anatomy.
